- 33 Thinking About College
- 34 Military Careers
- 35 Construction Careers
- 35 Apprenticeship--What Is It?

New Hampshire Job Notes 2001

The 21st Century Has Begun.

What Direction Will You Take?

Sometimes, it seems like you're spinning around in circles trying to decide what to do for your life's work. You thought you were going to be a pilot when you were younger. It seemed exciting, you could travel, and it couldn't be that hard to fly a plane, right? Then you got older, learned a little bit more about yourself and the world, and now you're not so sure anymore.

Well, doing a little career development planning can go a long way in helping you point yourself in the right direction. Do you have the right kind of personality to be a pilot? Do you have the aptitude to learn HOW to fly an airplane? Can you handle the stress of being in charge of an aircraft? What kind of skills will you need?

Nobody has one magic answer for you. You'll ultimately be in charge of your own destiny. But, there are lots and lots and lots (Wow, that's a lot of lots!) of suggestions just waiting for you to consider. *Job Notes 2001* is one place where you will find help.
